

# INVISACOOK

## Controller Spec Sheet

### DESCRIPTION

**INVISACOOK – Controller** is a complete, self-contained system. This control box is fully touch screen, but it can also be controlled thru Wi-Fi using your Invisacook App.

### FEATURES

- Easy to see touch screen
- Black background to red lights
- Power Boost option for faster speed.
- Wi-Fi capable with the Tuya-Smart App so you can control your unit from anywhere.
- Can be hidden anywhere due to its sleek body and features

### DEVICE OPERATION from Controller

When a compliant receiver such as an induction quality pan is placed on the induction coil, the unit will automatically adjust the charging power, based on the feedback command from the controller. When searching for connection, LED number will blink red, once pan and unit are connected the LED number will stay illuminated. If the pan moves too far in relation to the induction coil, the LED will blink IC and a Beeping noise will follow, indicating an error in connection. If this (or any other error condition) occurs, try resetting the unit by unplugging it and waiting 10 seconds to reconnect, for an automatic reset.

Status	Indicator
Off	No power/inactive
Power on	LED lights on Red Dash
Connected	LED Number stays illuminated
Lost of Connection	LED Blinking IC Red
Noise Alert	Beeping Noise of no Connection
Error condition	A Letter Followed by a Number (H-8)

### FOREIGN OBJECT DETECTION

INVISACOOK - Controller - Individual contains an algorithm for sensing the presence of foreign objects placed on the unit. When a foreign object is placed on the transmitter coil during operation, the unit will shut down and the LED will flash red if the object interferes with the system.

**USER INTERFACE:**

**Buttons and display:**

### **3) Basic Functions:**

#### **1) Power on:**

when power is on, all the LED light 1s with beep, then go off, if the working surface temperature is over 60°C on this unit, the related digital LED will show "H"; and all the buttons are invalid except Power and Child Lock key.

#### **2) ON/OFF:**

Press power key to start stand by model, indicator lights, beep once, the related digital LED will show flashing "H" if it's working surface temperature is over 60°C, if not, the digital LED will show "-". timer LED will show "--".

it will return to power on model, If the unit has not had any operation within 2 min. press power key can also directly return to power on model.

#### **3) Manual Mode (Power Selecting):**

Press any burner key you want, now the zone is selected. When the zone is selected the power display will show "0" and start to blink. You can slide or press 0-9 to start working.

#### **4) Lock:**

To avoid any mis-operation and ensure safety of children. Press this button for 3s to enable the function, the indicator will light. All buttons are disabled except Child Lock and power key.

#### **5) Booster:**

Activate Booster = Select first the cooking zone and then press Booster, now the Booster will be activated and the power display will show [ P ];

Deactivate Booster = Select first the cooking zone and then press booster, now the Booster will be deactivated, and the power display will return to previous power level.

#### **6) Power Sharing and number equivalents:**

The Invisacook unit is a shared power device. By sharing the power requirements within the four burners, this keeps the Invisacook unit very efficient and will require less than 25 amps with all four burners activated at once.

The Invisacook unit will operate under the following power selected parameters:

Once you have activated the Power Boost on either the left side or the right side of the unit, a maximum of power level 8 (eight) can be attained on the same side ONLY while that power boost is on.

A maximum of power level 8 (eight) and 6 (six), without the Power Boost, on each side independently can be attained using all four burners at once. The unit will automatically change to its respective power levels when all four burners are used simultaneously.

#### **7) Timer:**

You can set the time max to 99minutes and this button can be activated only when burner is working. Press 0-9 keys to set timer.
